Helpful - Strengths and Opportunities

Harmful - Weaknesses and Threats

Internal - Strengths & Weaknesses internal to the organization

External - Opportunities & Threats external to the organization

	Helpful	Harmful
Internal	Strength	Weakness
External	Opportunity	Threat

	Strength	Weakness
Opportunity	Can rapidly pursue opportunities	Overcome weaknesses with strengths in order to pursue opportunities
Threat	Can pursue opportunities once the gaps are bridged	Create a defense

One way of utilizing SWOT is matching and converting. Matching is used to find competitive advantage by matching the strengths to opportunities.

Converting is to apply conversion strategies to convert weaknesses or threats into strengths or opportunities. An example of conversion strategy is to find new markets. If the threats or weaknesses cannot be converted, a company should try to minimize or avoid them.

- Define the problem.
- Gather information, data and evidence.
- Identify all issues and events that contributed to the problem.
- Determine root causes.
- Identify recommendations for eliminating or mitigating the reoccurrence of problems or events.
- Implement the identified solutions.

Principle	Description
Knock	[opens doors and unseams barriers] The Knock permits no seal and no isolation. It thrusts us gleefully out of the safety of ignorance Its followers are characterized by intense dreams, visions of other places, perceptiveness, manual dexterity, and a disconnect with reality
Edge	[battle and struggle] All conquest occurs at the Edge. One who dwells there is blind, and cannot be wounded. Another is strong, and grows stronger violence, betrayal, cunning, and pain. Its followers are characterized by cunning, bloodlust, and often a sense of artfulness in their violence.
Winter	... [Winter is the principle of silence, of endings, and of those things that are not quite dead.] death, remembrance, unlife, debilitation, and beauty. Its followers are sometimes characterized by remorseless misanthropy and sometimes by kindness through euthanasia, but are always characterized by silence
Lantern	Life is a pure flame, and we live by an invisible Sun within us.' - Thomas Brown [Lantern is the principle of the secret place sometimes called the House of the Sun, and the light above it.] unkindness, knowledge, the Mansus, and the Glory. Its followers are characterized by mystically powerful dreams and a devotion to the Sun
Moth	[Moth is the wild and perilous principle of chaos and yearning.] I knew a man who captured moths in a bell-jar. On nights like this, he would release them one by one to die in the candle change, whimsy, unreason, secrecy, nature, and the Wood. Its followers are characterized by stealth, erratic behavior, and agendas known only to themselves

Heart	[continues and preserves] The Heart Relentless beats to protect the skin of the world we understand life, preservation, protection, union, and the drumbeat and dance that must never cease. It is unstoppable in the face of adversity, and its followers are often characterized by relentless cheerfulness and obsessive determination
Grail	Hunger, lust, the drowning waters. [The principle of the Grail honors both the birth and the feast.] desire, birth, seduction, and thirst. Its followers are characterized by inhuman desirability and an irresistible charisma
Forge	[transforms and destroys] Fire,' I once read, 'is the winter that warms and the spring that consumes transformation, artifice, fire, and destruction. Its followers are characterized by ingenuity, mechanical thinking, and superhuman strength

3. Strategy

“productivity in itself does not secure power and therefore does not secure the gratifications of life. After all, slaves can be productive.”

THE ROLE OF FRAUD IN NATURE

Organisms typically base their success primarily on deception and rely on actual force or mutually advantageous trade (symbiosis) as little as possible. This should be nearly self-evident, but is generally overlooked due to the moral codes we elitists foist on our subjects. Camouflage is universal among predators and victims alike. Blossoms imitate fragrances and colors which are sexually attractive to certain insects in order to effect pollination. Dogs bark ferociously and feign attack on enemies of whom they are, in fact, terrified. Human mental prowess and communicative powers have merely provided superb elaboration on nature's old theme of fraud, and added its own distinctive feature: self-delusion.

Human hierarchies, in contrast to the animal variety, are best sustained when the members are deluded regarding the oppressive nature, or better, even the very existence of the hierarchy! Not only is fraudulent bluff and bluster used to achieve dominance but fraudulent altruism and collective institutions are used to conceal dominance once achieved.

Visible rulers are highly vulnerable. Thus we see visible rulers claiming to be representatives of God, the common good, the material forces of history, the general will (either through vote or intuition), tradition, or other intellectual "spooks" that serve to lessen the envy of the ruled for the rulers. Encouraging such self-delusions among the masses of the ruled is universal for visible governments.

By embracing deception wholeheartedly at every level, finance capitalism, or rule through money, has fashioned the ultimate system yet devised for the secure exercise of power. Dominance in all aspects of society is surreptitiously accomplished while the great majority of the ruled, and even most of the visible leaders, believe themselves to be fairly autonomous, if harried, members of a pluralistic society. Nearly everyone believes major decisions to be the vector sum of autonomous pressures exerted by business, labor, government, consumers, social classes, and other special interests. In fact, the vectors of societal power are carefully balanced by us so that any net movement is in a direction chosen by us.

OCCULT KNOWLEDGE AS THE KEY TO POWER

Throughout history, secure ruling elites arise through secret, or occult, knowledge which they carefully guard and withhold from outsiders. The power of such elites or cults diminishes as their occult knowledge is transformed into "scientific" knowledge and vanishes as soon as it becomes "common sense."

Secondarily, the power of the lords of money rests on an occult knowledge in the area of politics and history. We have quite successfully corrupted these sciences. Although many people are familiar with our secrets through such books as "1984" by the disillusioned George Orwell, few take them seriously and usually dismiss such ideas as paranoia. Since real politics is motivated by individual self-interest, history is viewed most accurately as a struggle for power and wealth. We do our best to obscure this self-evident truth by popularizing the theory that history is made by the impersonal struggles between ideas, political systems, ideologies, races, and classes. Through systematic infiltration of all major intellectual, political, and ideological organizations, using the lure of financial support and instant publicity, we have been able to set the limits of public debate within the ideological requirements of our money power.

The so-called Left-Right political spectrum is our creation. In fact, it accurately reflects our careful, artificial polarization of the population on phony issues that prevents the issue of our power from arising in their minds. The Left supports civil liberties and opposes economic or entrepreneurial liberty. The Right supports economic liberty and opposes civil liberty. Of course, neither can exist fully (which is our goal) without the other. We control the Right-Left conflict such that both forms of liberty are suppressed to the degree we require. Our own liberty rests not on legal or moral "rights," but on our control of the government bureaucracy and courts which apply the complex, subjective regulations we dupe the public into supporting for our benefit.

Innumerable meaningless conflicts to divert the attention of the public from our operations find fertile ground in the bitter hatreds of the Right-Left imbroglio. Right and Left are irreconcilable on racial policy, treatment of criminals, law enforcement, pornography, foreign policy, women's liberation, and censorship to name just a few issues. Although censorship in the name of "fairness" has been useful in broadcasting and may yet be required in journalism, we

generally do not take sides in these issues. Instead we attempt to prolong the conflicts by supporting both sides as required. War, of course, is the ultimate diversionary conflict and the health of our system. War provides the perfect cover of emergency and crisis behind which we consolidate our power. Since nuclear war presents dangers even to us, more and more we have resorted to economic crisis, energy shortages, ecological hysteria, and managed political drama to fill the gap. Meaningless, brush fire wars, though, remain useful.

We promote phony free-enterprise on the Right and phony democratic socialism on the Left. Thus, we obtain a "free-enterprise" whose "competition" is carefully regulated by the bureaucracy we control and whose nationalized enterprises are controlled directly through our government. In this way, we maintain a society in which the basis of our power, legal titles to property and money, remain secure, but in which the peril of free, unregulated competition is avoided and popular sovereignty is nullified. The democratic process is a sitting duck for our money power. Invariably we determine the candidates of the major parties and then proceed to pick the winners. Any attempts at campaign reforms simply put the rules of the game more firmly under our government's control.

Totalitarianism of the fascist or communist varieties is no danger to us as long as bastions of private property remain to serve as our bases of operation. Totalitarian governments of both Right and Left, because of the vulnerability of their highly visible leaders to party rivals, can be manipulated easily from abroad. Primarily, totalitarian dictatorships efficiently prevent new money lords that could challenge our power from arising in whole continents, civilizations, and races.

Manipulation

Factors influencing the values held by young people

Controlled Opposition

The elite are masters of psychology.

When you look to their occult literature that has been in circulation for hundreds of years these aren't the ramblings of madmen they're the works of thinkers and philosophers who knew the human condition and want to rule it. That's why they're so successful at disinfo they have been doing it for eras.

For example Michael Aquino of the temple of set.

He was integral in creating the idea of >satanic panic

And diminishing the very real claims of satanic ritual abuse. Using his ridiculous looks and power other language and knowledge of the human condition he and his media cronies completely ruined the viability of any claims to satanic abuse.

Despite the fact that John decamps chief investigator and son were killed in an obvious air traffic assasination.

And a number of children who were placed on day care centres under his realm of influence were found to have contracted Chlamydia among other physical signs of abuse.

If I am correct the military police and FBI 'took over' this investigation relating to the massive sexual abuse scandals which were coming to light on military bases which all links into Mkultra and drug smuggling on the west coast

During his Oprah Winfrey interview they have a controlled party in the crowd say outlandish stuff and Aquino tears him apart all bread and circus to establish 'satanic panic' in your mind.

Trauma

Social alchemy

Social alchemy is using events, news or media to inflict trauma on a populace to initiate a psychological change on a population level.

For example the anti war movement of the Vietnam era was a finely crafted bit of social alchemy used to create drug culture in America and anti war sentiments and anti patriotic sentiments in the western world.

The same was repeated again in Iraq and Afghanistan, fight illegal wars publicise your people's atrocities and bring in more drugs

So the insidious banker elites used the Jews against Germany in Weimar and then used the conflict as a stage to set up the holocaust the world's finest act of psychological alchemy. The dawning myth of the modern motion picture world.

Banking interests have used holocaust depictions to traumatised the world, for the European the guilt of their ancestors or some shit, for Jews the trauma of holocaust and for blacks and Asians they relate from their own historical traumas that weren't their own. They then externalise these traumas into the outside world and the elites perpetuate these traumas into the outside world. If you ask me the elites have a certain favourite bunch but none the less they will kill their own to serve a purpose have no doubts some Jews did die during world war 2 but I think the facts are distorted to suit Marxist goals of creating anti-Semitism myths and it has always been the way of the Marxist-frankist. They use these language barriers like racism and anti-Semitism to block realms of discussion to create impasses in politics. If we could just speak fucking plainly about the necessity of a stable family good moral teaching and definitely about how Marxist/Frankist with a mixture of traitors of all varieties and coconspirators supremecist interests have subverted the morals of entertainment and the world for their own interests, then we would be better off.

Manufacturing consent

For example in the UK when I was much younger gay marriage issues and homofaguality was being pushed hard by the British media. It was no surprise that coronation Street, Hollyoaks and popidol all pushed this agenda at the same time

Gulf of Tonkin. This suite of cyber security breaches is only interrupting and inconveniencing civilians. No hard targets have been hit and nothing existential. They are manufacturing consent for war on China. The same reason they are now pushing lab leak theory and throwing Fauci under the bus. The last 2 years have been a psyop to prepare the American public to be emotionally frustrated enough to consent to war on China. They will also reveal China hacked the election and they will also fake an attack on Taiwan by China. They might even detonate a nuke in the ocean nearby and blame it on China saying they intercepted or they shot down a Chinese nuclear submarine as a warhead was being launched

Shill

It's not for you it's for people with forming minds who are younger. Look to 9gag too any time there is a female look at the comment section and you see shills trying to drive people into a state of lust, defeatism or anger it's bewildering how pervasive the social engineering is on that app. It essentially functions as JIDFs internet brainwashing app.

Only way to free yourself from the programming is seeing that it is everywhere I suppose.

They hate the natural sexes and seek to invert them, they push for sodomy instead of procreational sex, they want mothers to murder their children instead of birth them, they want to doctors to poison and 'treat' instead of healing and curing, they want food that does not nourish, they want to defile our bodies with tattoos and piercings, fake tans, hair dyes and cosmetics of every kind. It is all right in front of our eyes, yet it is sometimes difficult for us to notice as we have become so accustomed to their evil.

They mutilate and disfigure us to make parodies of the sexes (transgenders), they pump us full of chemicals and hormones to upset the natural balance. They have artificial wombs, cloning technology, the ability to do all manner of things that despite us all having some vague understanding of; we do not understand it or know what is truly going on. They have an abundance of 'hidden knowledge', and they use it to destroy what is natural.

The world is already horrific, but it's going to get much worse.

Most American bands were a product of the CIA's Look Out Mountain facility in Los Angeles. It housed one of the largest indoor film studios at the time.

Most people have never even heard of the place.

Pop music is mostly crafted to function in a way that imitates the technique known as psychic driving. Repeating asinine phrases like "I want to die young over and over" Blues clues and it's recent trans parade stuff and all that

/gif/

/gif/ functions like 'elsagate' but for adults.

There is a potent mindstate that the elite are aware of and it's the mixture between violence and sex. That hit of the brain chemicals and hormones that it produces is intoxicating and opens you up to more sexually suggestive states, it is no mistake bbc Hypno trainer threads are next to nigger hate threads, which are next to fight threads which are next to bwc.

It is 100% run by bad actor agents who use that board as goad to all those that frequent it.

The montages memes and archive's of gore these people have are too well produced and too uniformly posted to be anything other than a psyop.

So before you go to gif consider what I said. Go jerk off to porn hub or even better something not produced by Jews who are using porn as a weapon to further fuck up the family unit and teenagers

Invincible

This show was social conditioning to fuck.

Ask any normie what they remember they don't remember shit but the gore.

The gore.

Have any of you guys noticed how much normies love gore and sex. I tried specifically discussing scenes such as the cuck cops visit to Buckingham palace. Or how the show was made to annoy every single race. The main antagonist describes his Asian bride as an animal.

The whole show promulgates the satanic ideals of genetic superiority and that the weak should fear and be reaped by the strong. I have no idea where the series goes.

But ask a normie what they remember.

They remember the gore my friends, and do you think that is healthy?

Water

- Most mammals require water regularly. Grazing animals are usually never far from water as they need to drink at dawn and dusk. Converging game trails often lead to water; follow them downhill. Meat eaters are not good indicators — they get moisture from their prey.
- Grain eaters, such as finches and pigeons, are never far from water and drink at dawn and dusk. When they fly straight and low they are heading for water. When returning from water they fly from tree to tree, resting frequently. Water birds and birds of prey do not drink frequently and are therefore not good indicators.
- Bees are especially good indicators. They fly at most 6.5 km (4 miles) from their nests or hives. Ants are dependent on water. A column of ants marching up a tree is going to a small reservoir of trapped water. Such reservoirs are found even in arid areas. Most flies keep within 90 m (100 yards) of water.
- Lizard collect what little moisture they need from dew and their prey. Not good indicators.
- Human tracks usually lead to a well, bore hole or soak. It may be covered with scrub or rocks to reduce evaporation. Replace the cover.

- Dew & Rain collection

COA 1: Gather required items:

No. 040: Convert Seawater to Drinking Water

CONOP: Use everyday items to convert salt water to drinking water.

COA 1: Cut the bottom off an empty plastic water bottle, and the top off a beer/soda can.

COA 2: Fold bottom of water bottle up into itself, creating a gutter to trap water.

COA 3: Fill can with seawater and place bottle over can with cap in place. Left in the sun, drinkable water will condense and run down into gutter.

COA 4: Remove cap and drink.

COA 1: Cut a hole just below a bamboo joint; insert small-diameter bamboo straw and drink. Each section contains drinkable water.

COA 2: Cut notch at highest point on a vine; cut bitter end, and water will flow.

COA 3: To drink directly from banana or plantain trees, cut tree down at base and scoop out stump until bowl fills with water.

COA 1: Conserve your body's water levels.

Stay covered.

Shade during the day. Travel at night.

Do not eat.

COA 2: Get to high ground, carefully observe surroundings. Follow signs of water.

COA 3: Dig in dry riverbeds and under vegetation.

Tactics

Dau Tranh Strategy: Integrated political and military struggle

Political struggle:

Dan Van- Action among your people

Total mobilization of propaganda, motivational & organizational measures to manipulate internal masses and fighting units.

Binh Van- Action among enemy military

Subversion, proselytizing, propaganda to encourage desertion, defection and lowered morale among enemy troops.

Dich Van- Action among enemy's people

Total propaganda effort to sow discontent, defeatism, dissent and disloyalty among enemy's population.

Military struggle:

Phase 1: ORGANIZATION AND PREPARATION-

building cells, recruiting members, infiltrating organizations, creating front-groups, spreading propaganda, stockpiling weapons.

Phase 2: TERRORISM- GUERRILLA

WARFARE - kidnappings, terrorist attacks, sabotage, guerrilla raids, ambushes, setting up parallel governments in insurgent areas.

Phase 3: CONVENTIONAL WARFARE-

regular formations and maneuver to capture key geographical and political objectives.

The classical Maoist model requires a strong, unified guerrilla group and a clear objective. However, some contemporary guerrilla warfare may not follow this template at all, and might encompass vicious ethnic strife, religious fervor, and numerous small, 'freelance' groups operating independently with little overarching structure.

Main Force regulars

Regional fighters

part-time Guerrillas

Guerrilla operations typically include a variety of strong surprise attacks on transportation routes, individual groups of police or military, installations and structures, economic enterprises, and targeted civilians. Attacking in small groups, using camouflage and often captured weapons of that enemy, the guerrilla force can constantly keep pressure on its foes and diminish its numbers, while still allowing escape with relatively few casualties. The intention of such attacks is not only military but political, aiming to demoralize target populations or governments, or goading an overreaction that forces the population to take sides for or against the guerrillas.

Whatever the particular tactic used, the guerrilla primarily lives to fight another day, and to expand or preserve his forces and political support, not capture or holding specific blocks of territory as a conventional force would.

Psychology

===[Enemy]==

- Keep the System off balance with surprise attacks. Provoke them into PR blunder
- Make one assailant seem like many[Graffiti, Letter, Vandalism, ...]
- Maintain pressure with one-man low-risk activity

===[Neutral]==

- Attract media attention, contact independent reporter
- Gain sympathy from the public, maximize optics
- Inspire copycat: Aesthetic, Sigil, Catchphrase
- Distribute recruit material

Threat

Many insurgents died in GWOT to canister shells from tanks racing behind and flanking RPG teams in alleys or orchards.

Defense

Fire bottles are basically an automated fire extinguisher system used on Bradleys, Abrams, some HMMWV's, etc.

Iirc, the Bradley has 2 for the engine, 2 for the turret, 1 for the crew. You might be able to find more info by looking up "AFES Fire Bottle", since they're part of the AFES system

Solution

[ammo blowout panel] WW2 EOD guys using thermite to burn into bomb casings used regular ceramic gardeners pot-plants (hint, hint) with a thin piece of tin under the drainhole to hold the thermite inplace until it was melting time.

Convoys

I think the moral of this story is to not attack convoys. That is, unless you are in a narrow road which there is no escape.

Withdrawal

Bunker

Ambush: 274 Main Force VC versus 11th Armored Cavalry, 21 Nov 1966

Thermite

Destroy classified radios before capture, wreck the chambers of cannons about to be lost.

Cache

Always have multiple cache so your fighter can easily blend back into the general populace

- Method: Concealment, Burial, Submersion
 - Material: PVC pipe, water bottle
 - Site: Landmark, secure primary and alternate routes
- X0005_cache, No 014 Conceal gear using caches

4. The Tongue

There are only 5 ways to write, in descending order of complexity

- Dragon seal script: chinese, japanese, anything I missed that derives from the ancient oracle dragon bone script found in china
- Abugidas: derived from sanskrit, every letter represents a sound with an expression attached, making a syllable, common in asia, examples include hindu and thai script
- Arabic: Abjad
- Alphabets: each letter represents only one sound (vowel or consonant) with no further expression, little to no connection between writing and speech, examples include latin and cyrlic
- Hieroglyphs: the most ancient way to write that has fallen out of use, icons represent a meaning only and each has to be learned individually, language is indecipherable without elaboration, examples include maya script, egyptian script and sumero-akkadian cuneiform

You can try counting the number of angles inside every letter because in some languages that is what determined the sound. You can then compare that to sounds of letters in other Semitic and Indo-European languages

The Unknown

Vinča

The Vinča symbols have been found on many of the artefacts excavated from sites in southeast Europe, in particular from Vinča near Belgrade, but also in Greece, Bulgaria, Romania, eastern Hungary, Moldova, southern Ukraine and the former Yugoslavia. The artefacts date from between the 7th and 4th millennia BC and those decorated with these symbols are between 8,000 and 6,500 years old.

Indus/Harappa script

Since 1875 more than 4,000 objects inscribed with this script have been found. Most inscriptions are short and consist of five symbols on average, with 17 in the longest one. Inscriptions are mostly on flat, rectangular stamp seals, and also on tools, tablets, ornaments and pottery.

417 distinct symbols have been identified, and the direction of writing is thought to be right to left, and sometimes boustrophedon. Many people have tried to decipher the Indus script, but none have succeeded so far, or at least none have produced a generally-accepted decipherment. Some believe that the Indus script was used to write a Dravidian language, others that it was used to write an ancestor of Sanskrit.

Judaism is ran from the top down by Sabattean Frankists and Khazarian Satanist Jews, they are in alliance with free masonic Satanists or lord over them who knows.

They use blood rituals and sacrifices as a way to establish compramat and because some of them genuinely believe in blood sacrifice.

Human Sacrifice

It is also no coincidence that some planned Parenthood facilities are shaped like old human sacrifice temples of yonder year.

I believe what I believe and im now going to tell you what THEY believe. Upon death a person releases energy which can be captured or used through a number of means. So this baby killing mill is like a nuclear power plant of evil occult energy.

If you guys only knew the number of wiccans, witches and Satanists that employ these establishments they would turn your stomachs even more then they do.

If you were to read Alister Crowley's works and other works relating to the sacrifice of humans nothing is more potent than an innocent child. So you can see the attraction for these Satanist pricks.

You will never win the people who protest for abortion over they are in the realm of Satan. You can tell them all about personal responsibility and how

most abortions aren't related to rape or incest and yet they still will continue on because do what thou wilt is a corner stone of their self, temperance is alien.

Hidden Life in Freemasonry. This book was written for people involved in Luciferian rituals In the higher more occult rites of Freemasonry. In the preface, Leadbeater talks of butterflies (pp viii-ix), which has the double meaning in the occult of souls (spirits). in the last chapter, chapter 10, he gives Masonic rituals to Invoke angels (demons) through Egyptian magic. In these Masonic temples, the checkerboard square is used in a similar fashion as a magic circle for a coven. This picture is given as a paper trail to show the sex-magic rituals that take place within various Masonic groups.

A 5	the first Severity - the name of the fifth power of God was Elohim Gibor - God the Potent.
A 6	the first Beauty - the name of the sixth power of God was Eloah Vadaath - God the Strong.
A 7	the first Victory - the name of the seventh power of God was Jehovah Tzabooth - God of Hosts.
A 8	the first Glory - the name of the eighth power of God was Elohim Tzabooth - Lord God of Hosts.
A 9	the first Foundation - the name of the ninth power of God was Shaddai, El Chai - Omnipotent.
A 10	the first Kingdom - the name of the tenth power of God was Adonai Melekh - God.

In the three lower worlds these circles are intelligences, planers, and elements, but in this first divine world they are called the Rings of the Sacred Names.

B 1	the Second Crown - Metatron - the Angel of the Presence.
B 2	the second Wisdom - Raziel - the Herald of Deity who revealed the mysteries of Qabbalah to Adam.
B 3	the second Understanding - Tsaphkiel - the Contemplation of God.
B 4	the second Mercy - Tsadkiel - the Justice of God.
B 5	the second Severity - Samael - the Severity of God.
B 6	the second Beauty - Michael - Like Unto God.
B 7	the second Victory - Haniel - the Grace of God.
B 8	the second Glory - Raphael - the Divine Physician.
B 9	the second Foundation - Gabriel - the Man-God.
B 10	the second Kingdom - Sandalphon - the Messias.

In the second world, B 1 to B 10, the order of the spheres is the Name as in the Atziluthic World, but the ten circles of light are less brilliant and more tangible, and are here referred to as ten great Spirits—divine creatures who assist in the establishment of order and intelligence in the universe.

C 1	the Third Crown; the Hierarchy is the Cherubim	Chaioth Ha Kadosh	the Holy Animals.
C 2	the third Wisdom; the Hierarchy is the Cherubim	Orphanim	the Wheels.
C 3	the third Understanding; the Hierarchy is the Thrones	Aralim	the Mighty Ones.
C 4	the third Mercy; the Hierarchy is the Dominations	Chashmalim	the Brilliant Ones.
C 5	the third Severity; the Hierarchy is the Powers	Seraphim	the Flaming Serpents.
C 6	the third Beauty; the Hierarchy is the Virtues	Melachim	the Kings.
C 7	the third Victory; the Hierarchy is the Principalities	Elohim	the Gods.
C 8	the third Glory; the Hierarchy is the Archangels	Ben Elohim	the Sons of God.
C 9	the third Foundation; the Hierarchy is the Angels	Cherubim	the Scat of the Sons.
C 10	the third Kingdom; the Hierarchy is Humanity	the Ishim	the Souls of Just Men.

In the third world the ten globes of the original Atziluthic World are greatly limited and dimmed, but they are still infinitely powerful in comparison with the state of substance in which man dwells. In the third world, C 1 to C 10, the globes become hierarchies of celestial creatures, called the Choirs of Yetzirah. Here again, all are included within the ring C 1, the power which controls the Yetziratic World and which includes within itself and controls the entire world D

D 1	the Fourth Crown; Rashith Ha-Galagulum	the Primum Mobile - the fiery mist which is the beginning of the material universe.
D 2	the fourth Wisdom; Masloth	the Zodiac - the Firmament of the Fixed Stars.
D 3	the fourth Understanding; Shabbathai	the sphere of Saturn.
D 4	the fourth Mercy; Tzedeg	the sphere of Jupiter.
D 5	the fourth Severity; Madim	the sphere of Mars.
D 6	the fourth Beauty; Shemesh	the sphere of the Sun.
D 7	the fourth Victory; Nogah	the sphere of Venus.
D 8	the fourth Glory; Kokab	the sphere of Mercury.
D 9	the fourth Foundation; Levanah	the sphere of the Moon.
D 10	the Fourth Kingdom; Cholom Yosodoth	the sphere of the Four Elements.

The World of Assiah, or the elemental world of substance, is the one into which humanity descended at the time of Adam's fall. In all the ancient Mysteries, matter was regarded as the source of all evil and spirit the source of all good, for matter inhibits and limits, often so clogging the inner perceptions that man is unable to recognize his own divine potentialities. Since matter thus prevents humanity from claiming its birthright, it is called the Adversary, the power of evil. The fourth world, D, is the world of solar systems. The ruler of the fourth world is D 1, called by some the Fiery Heaven; by others the Primum Mobile, or the First Motion. From this whirling fire emanates the material starry zodiac, D 2, in contradistinction to the invisible spiritual zodiac of the Yetziratic World. From the zodiac, D 2, are differentiated the spheres of the planets in concatenate order.

D 1	the evil Crown; the hierarchy is called Thaumiel - the doubles of God - the Two-headed; the Archdemons are Satan and Moloch.
D 2	the evil Wisdom; the hierarchy is called Chaigidiel - those who obstruct; the Archdemon is Adam Belial.
D 3	the evil Understanding; the hierarchy is called Satharial - the concealment of God; the Archdemon is Lucifuge.
D 4	the evil Mercy; the hierarchy is called GamchicOTH - the disturber of things; the Archdemon is Astaroth.
D 5	the evil Severity; the hierarchy is called Golab - incendiарism and burning; the Archdemon is Asmodeus.
D 6	the evil Beauty; the hierarchy is called Togarini - the wranglers; the Archdemon is Belphegor.
D 7	the evil Victory; the hierarchy is called Harab Serap - the dispensing Raven; the Archdemon is Baal Chanan.
D 8	the evil Glory; the hierarchy is called Samael - the embroiler; the Archdemon is Adramelek.
D 9	the evil Foundation; the hierarchy is called Gamaliel - the obscene; the Archdemon is Lilith.
D 10	the evil Kingdom; the hierarchy is called NahemotH - the impure; the Archdemon is Nahema.

The ten Archdemons, corresponding to the ten Archangels of Briah. The black magicians use these inverted spirits in their efforts to attain their nefarious ends, but in time the demon destroys those who bind themselves to it.

Abrahamic

The original Hebrew term śātān (Hebrew: שָׂטָן) is a generic noun meaning "accuser" or "adversary", which is used throughout the Hebrew Bible to refer to ordinary human adversaries, as well as a specific supernatural entity. The word is derived from a verb meaning primarily "to obstruct, oppose".

<https://en.wikipedia.org/wiki/Satan> ::

Satan - Wikipedia

Anybody that uses a Hebrew word to describe mythological figures is essentially making an admission of ignorance.

The title means simply, "adversary". The OT God was Anu/El and his son, Yahweh, was the leader of what Israel became.

Lucifer told the humans in the Garden (gardens grow food, remember...) what Anu/El was doing and they kicked up out, thereby becoming conflated with "The Devil", because he was known dubbed an enemy or a "Satan".

Chaos

Chaos is not in itself, a system or philosophy. It is rather an attitude that one applies to one*'s magic and philosophy. It is the basis for all magic, as it is the primal creative force.

In the western tradition we have what we call "thoughtforms". A lot of people get these confused with tulpas, and on some levels they kind of are one.

However, thoughtforms are made around an idea. That idea in chaos magic traditionally was a sigilized version of something you wanted to give them an appointed task like... >go get butter For example. But the idea or goal of the thoughtforms could be vague or not there at all. Essentially the thing is a split off of your own mind put into an empty shell.

A hyper sigil is a sigil that's been extended through the fourth dimension. It's in effect one long giant fucking sigil that can take the form of a book, poem, songs or music albums, or comics to name a few.

These are effective but extremely dangerous ways of attempting to alter reality.

In effect the hyper sigil is like a miniature version of the occultists universe used like a voodoo doll to shape it as best as he sees fit.

Now propose you're an occultists who wants to change reality in a dangerous, but effective way, you would go towards hyper sigil first. But what if you want to do better? What if you want to make things happen to your designs more?

You'd make thoughtforms that are based off your sigil. Entire beings who's sole purpose is to make the sigil more effective and carry out your goals.

Oracle bones (Chinese: 甲骨; pinyin: jiǎgǔ) are pieces of ox scapula and turtle plastron, which were used for pyromancy – a form of divination – in ancient China, mainly during the late Shang dynasty. Scapulimancy is the correct term if ox scapulae were used for the divination, plastromancy if turtle plastrons were used.

These Golems serve as physical binding points for Servitors and Thoughtforms. Since the statues contain personal "parts" of the Thoughtform's creator, among other ingredients, they create the ultimate bond between Servitor and Creator.

A Golem, in Hebrew גָּלֵם, is an anthropomorphic being that is magically created entirely from inanimate matter, specifically clay or mud. The word Golem that means "my light form", "raw" material, connoting the unfinished human being before God's eyes

Leylines

Consider the schumman resonance. If you cover a plane in sand..
And you vibrate the plane...
cymatics! patterns appear, as the vibration itself creates geometry.
Now imagine the plane is an sphere.
The sphere vibrates at a certain resonance.
Energy gathers along the geometry...cymatics! What is a leyline, but geometry?
what is geometry, but expressed energy? and so being creatures born of the
earth, we gather where the geometry/energy is condensed. evolution at work,
instinctual...

Becker-Hagens is an acceptable theory, but I believe it lacks something
critically important. It seems too clean in a way. Perhaps the leylines naturally
move and the rulers of this world place special buildings on specific sites to
lock them in place?

Mud flood

Within the last 100-1000 years, civilization was reset and humanity lost much of its knowledge and many advanced technologies. This reset was caused by a huge flood that covered the land in a few feet worth of sediment. A few theorists equate this flood with the great flood of the Bible; if this theory is true, it would throw the Bible's timeline off by more than a thousand years. There are even fewer theorists that believe that church steeples were used to radiate electricity through the air and that giants ruled the Earth, but that is a whole different story that would require diving into the rabbit hole, headfirst. The proof of this flood comes from many examples of buildings that have seemingly been buried either fully or partially under the ground. There are pictures circling the internet showing Russia's Winter Palace, the US Capitol Building, and the Saint Mary Magdalene church having been dug out to reveal lower levels than previously known. These are three examples that seem to be commonly used by supporters of the mud flood conspiracy as evidence. There are other various examples used though, as countless examples of buildings with windows below ground level exist. These pictures make it seem as though some of these buildings had been intentionally buried and forgotten about. There is seemingly no logical explanation for this. Some have tried to debunk this theory by bringing up what is referred to as the "cultural layer" of dirt. This layer is sediment and dust that builds up around the places that humans live. However, this has only brought up more questions. Why would previous generations let this layer build up so high? This has resulted in another large part of the theory which is that some of history has simply been rewritten or erased.

mud flood, empty cities, orphan trains, tartaria

the sudden resurfacing of electricity and thousands of patents via tesla after the repopulation. it was all there already before, in another way, and coincidentally tesla was a tartar who moved to USA. Tartary could've been removed from History due to the great mud flood but their flag literally being Moloch makes me question the reasoning behind it all

Quantum

Everything is always in superposition because there's no such thing as wave function collapse, but proximity limits what can be seen for a given probability, it is tied to space so gravity can hold it together, but other things can do that too. Every possible combination of things exists, exactly ones. What changes is the probability of going from one frame to the next, and those probabilities have a magnetism+hysteresis to them: e.g. the particles in your body stick with your body, for the most part, or at least where you tend to go, because you have a body moving around - chances are they are very likely to be the nearly same of particles in your local set of worldlines - even though there are virtually infinite exactly identical copies of different sets of particles in the exact same arrangement for every moment of time scattered throughout the multiverse. Similarly, the ones that exist out in the middle of space with nothing around are fantastically unlikely unless you volunteer for spacex or similar - which some number of you most certainly do (then get ejected for violating the terms of Musk's slave labor contract and/or for PR purposes.)

Pole Shift

The Yellowstone fear mongering is a meme. It's a caldera. During the Younger Dryas Cataclysm (last pole shift) it was a major faunal refuge, especially for large animals like bison. High elevation plateau with surrounding mountain ranges protect against severe winds and tidal waves sweeping across the continent, lots of geothermal warmth to aid plant growth while the sun is blotted out, etc.

I think elevation and latitude are the key. The tsunami will completely wash over California and the west coast states. I want to be above 6,000 ft and as far south as possible. We are likely to head into an ice age after this.. not to mention if the sun blows off its shell there is not going to be a lot of light for a while.

12 000 years cycle

The Sun's output is increasing, but the talking heads are hiding it from the public. There is an impending natural disaster cycle that will cause widespread societal collapse and likely destroy the power grid permanently. It may not happen within our lifetime, but is definitely going to happen within this generation or the next 1 or 2 gens after that. The cycle happens roughly every 12000 years and our comfy time is just about up. Part of me thinks that this is the reason the (((powers that be))) are shilling for disasters so much in the media right now, and also the reason why they're engaging in these mass societal experiments involving totalitarian control hysteria.

Sleep

Hatman

Sometimes I wake up in the middle of the night and see silhouette of a cloudy being with a top hat. I haven't seen him in about 4 months but it's back and in my dreams now. It doesn't seem threatening, whenever I hallucinate it's just standing there watching me, and in my dreams it's the same. A quick google showed me that it's likely "Hatman", and there's people all around that have seen him.

The mall

Retrowave, giant, [24745918](#). So many people describe this location the exact same way. Endless amount of stores that seem to lead into one another directly, steep escalators where the laws of physics don't apply, difficult or impossible to find exits, seems to exist as a city of some sort unto itself, often connected to or close by a similar University World or Library World, etc.

For me, the mall is often utopian, as if some fully harmonious society exists within this massive mall complex that's implied to be like "post-capitalism" or something.

Magnetism

Most regions of the brain had five million magnetite crystals per gram of tissue. The tough membrane that covers the brain had 100 million crystals per gram. Each human brain on average contains seven billion particles of magnetite, weighing a total of one-millionth of an ounce

Low-density

They hoped I could help them with reasons for these results, which disturbed them.

The first thing they told me was that the mice turned criminal in their low-density magnetic field environment.

"Criminal!?" I exclaimed. "How in the dickens do you tell when a mouse turns *criminal*?" I asked.

"Very simple," was the answer. "There are basic end-cruelties for almost all mammals; mice and humans are no exception. Cannibalism is the ultimate cruelty, and they turned cannibalistic. Even though they had plenty of the same food as the mice in the normal magnetic field strength cylinders, they indulged in cannibalism as a preference. The mice in the normal cylinders treated each other normally - and ate only their normal food." He paused a moment.

"There's another thing which really confounds us," he continued. "These same mice who turned cannibalistic indulged in *forcible* rape literally around the clock. That and murder are the other end-cruelties."

"Is it possible that you can tell the difference between rape and forcible rape in mice?" I asked. "It seems impossible to differentiate in mice."

"Oh yes," he said, "It happens all the time in the

After some consideration, I gave them my conclusion. I would commit that a lowering or lowered magnetic field environment could give its occupants a sense of impending doom. Certainly there would be a feeling that something out of control was destroying them, so why not get what they want irrespective of consequences? In the case of humans, *those without empathy turn criminal first*. In the case of animals, it is probably proper to assume that there is little or no empathy there to start with.

Magnetic brain stimulation 'reduces belief in God, prejudice toward immigrants'

Disabling certain areas of the brain with transcranial magnetic stimulation can reduce a person's belief in God and negativity toward immigrants, claims a new study published in the journal *Social Cognitive and Affective Neuroscience*.

The research is the result of a collaboration between researchers from the University of York in the UK and investigators from the University of California-Los Angeles (UCLA).

Transcranial magnetic stimulation (TMS) is a procedure currently used to treat depression. It works by using magnetic energy to stimulate nerve cells in areas of the brain involved in mood control.

Medical

A lot of physics seems to be built on unproven theories. same can be said about biology. germ theory has never been proven and has even been disproven during the Spanish flu. to this day, nobody has been able to prove HIV causes aids either. kary mullis has a great interview talking about the aids epidemic which fauci happened to also be a part of. coincidentally kary mullis also invented the PCR testing method used to fabricate the corvid pandemic which fauci is also a part of. he specifically states that a PCR test should never be used as a diagnostic tool, yet that is what we are currently doing. kary mullis also died a month before the pandemic started out of pure coincidence

Lovecraft

Lovecraft himself claimed to not believe any of what he wrote (or that's what I've always heard, I'll admit I've never delved into his personal letters) but he had horrible nightmares all his life and wrote the first paragraph of Nyarlathotep during a hypnagogic state from one of the nightmares, so the man might've been accidentally channeling some weird shit.

Despite many claims, the title of the Old Ones isn't a very concreted thing in his writing. I assume you are referring to the Great Old Ones, who are the alien deities of his stories. They come in a few variants themselves, most notable is the lesser children of the Outer Gods, such as Cthulhu, and the higher ones are of course the Outer Gods themselves, who have a much larger hand in the universe than a human could comprehend. Azothoth is the highest of the Outers, and basically the god of gods who created the universe.

Next is Yog-Sothoth who is... Well, "Yog-Sothoth knows the gate. Yog-Sothoth is the gate. Yog-Sothoth is the key and the guardian to the gate. Past, present, future, all are one in Yog-Sothoth. He knows where the Old Ones broke through of old, and where they will break through again." essentially the means of getting into and out of the universe. There are a few others, but I'll leave them to you to discover.

Akashic Records

The majority of the world's cultures, faiths and philosophers generally agree that the Akashic Records exist,

The Hindus believe a universal substance call akasha - from which the natural elements of water, fire, earth and air were created

The Akashic Records are perceived to be the collective memories and histories of every thought, physical and emotional vibration, sound, major event, minor incident and all rnmovement in eternity. The Akashic Records are the entire history of everything that ever has been, and everything that ever will be. They could be looked upon as a memory bank containing details about everything that has happened in the Universe, and information about every spirit and the many lives they have lived.

If you dont individuate, you fall back into the pleroma. that aether where our base thoughts come from, thats freely available for anyone to read aithout much experience. just introspection. the akashic records, the hive mind, the pleroma, the 64 ways, its all the same, just like you and so many others before you and after you.

Tulpa

Typically, thoughtforms become corrupted over time and try to kill you. Or lead you down into total insanity and delusional thinking. Looking at cancerous places like /r/tulpa and about every tulpa forum online shows these well.

Now what is a tulpa? Tulpas use a similar process in the traditional source materials inside buddhism, where you make up a hallucination of a body with your mind until it's so real you can actually see it.

The difference however is that instead of the tulpa having your own mind (these are called tulku) or some idealized goal, it's got the mind of some other spiritual being you've put into it. These are also dangerous but in the same way summoning goetia demons is dangerous.
